

# MASS PRODUCTION AND PRODUCT QUALITY

Product quality is very important and can lead to irreversible result if it is not controlled with scientific data and professional engineer for production.

We require factory to put all the products we use through :

- Ingression test (IP Test) –water and dust ingression
- Salt Spray test - for corrosion from rain or other chemicals
- Stress test – put product under extreme condition
- Thermal test – test for high and low temperature
- Wire test – strength and conductivity of the wires
- Connector test – test for water resistance and Connectivity
- Burn-in test - stability of the product

Customization on the product or the mounting to suit a specific project or installation method is our specialty . We are within one of the best due to experience and 30 years of lighting and electronic of knowledges and history.
